#### **NEW QUESTION: 1**

Refer to the partial configurations in the exhibit.

What address is utilized for DR and BDR identification on Router1?

- A. the sequential 2/0 address
- B. the sequential 1/1 address
- C. an arbitrarily generated internal address
- D. the configured router-id address

**Answer: D**

Explanation:

The point of this question is DR and BDR election of OSPFv3. OSPF test the title of the DR and BDR election.

DR and BDR election there are two standards:

- 1.Interface priority, the default is 1.
- 2.Router-ID. manually specify > Highest loopback interface > Highest active IP address

This title, there is no priority list, it is the default, manually specify the Router-ID. 10.1.1.3, so hand-

Router-id specified in the election has become the standard DR and BDR.

The selection of DR and BDR is the same between OSPFv2 and OSPFv3.

**NEW QUESTION: 2**

Which tool helps a customer determine if the interoperability of their bill of materials (BOM) is supported by HP?
