### NEW QUESTION: 4

12. The company is considering a new product line. The product line is expected to generate a net present value of \$70,000. The product line is expected to generate a net present value of \$70,000. The product line is expected to generate a net present value of \$70,000.

2. The product line is expected to generate a net present value of \$70,000. The product line is expected to generate a net present value of \$70,000. The product line is expected to generate a net present value of \$70,000.

US \$ 70,000. The product line is expected to generate a net present value of \$70,000. The product line is expected to generate a net present value of \$70,000.

The product line is expected to generate a net present value of \$70,000. The product line is expected to generate a net present value of \$70,000. The product line is expected to generate a net present value of \$70,000.

A. The product line is expected to generate a net present value of \$70,000. The product line is expected to generate a net present value of \$70,000. The product line is expected to generate a net present value of \$70,000.

B. The product line is expected to generate a net present value of \$70,000. The product line is expected to generate a net present value of \$70,000. The product line is expected to generate a net present value of \$70,000.

C.  $\hat{i} < \ddot{e} \hat{i} \pm \hat{i} > \cdot \ddot{e} | \neg$ .

D.  $\ddot{e}^1 \hat{i} \hat{s} \hat{i} > \cdot \hat{i}^1 \text{TM}$

**Answer: B**

Explanation:

Matching is the simultaneous or combined recognition of revenues and expenses resulting directly and jointly from the same transactions or other events. Expenses should be associated with the revenues that they help to create. Because the catalogs are still on hand at the balance sheet date, they will not contribute to an inflow of economic benefits until the next period. Hence, the cost should be deferred and matched with the revenues of the following period.
