You are designing the network infrastructure for an application server in Amazon VPC. Users will access all the application instances from the Internet, as well as from an on-premises network.

The on-premises network is connected to your VPC over an AWS Direct Connect link.

How would you design routing to meet the above requirements?

A. Configure two routing tables: one that has a default route via the Internet gateway, and another that has a default route via the VPN gateway.

Associate both routing tables with each VPC subnet.

B. Configure a single routing table with a default route via the Internet gateway.

Propagate specific routes for the on-premises networks via BGP on the AWS Direct Connect customer router.

Associate the routing table with all VPC subnets.
