NEW QUESTION: 1

You identified a suitable project to pilot an automation tool and planned and conducted a pilot. The pilot has been successful and tool is being deployed within your organization, with a plan to increase tool use by the one project at a time. During this rollout some test processes will be changed slightly to gain additional benefits from using the tool.

In the pilot project, a small set of manual tests were automated for the first time. You are currently monitoring the test automation efficiency and this reveals that the automation regime for the tests is not yet mature.

Which of the following statements is TRUE?

- A. The pilot project should have been critical so that maximum benefits were delivered
- B. The approach used for deployed this tool is aligned to the standard success factor for deployment
- C. The test process should be radically changed to gain additional benefits from using the tool.
- D. The target defined for the project was inappropriate, because the automation regime for the automated tests at the end of the pilot is not yet mature.

Answer: C
