Explanation/Reference:

Topic 7, Woodgrove Bank

Company Overview

Woodgrove Bank is an international investment banking institution. Woodgrove Bank has a partner company named Contoso, Ltd.

Physical Location

Woodgrove Bank has a main office and 10 branch office. Each

branch office has a WAN link to the main office.  
Existing Environment Active Directory Environment  
The Woodgrove Bank network contains an Active Directory forest named  
woodgrovebank.com. The forest contains multiple domains and one  
Active Directory site.

The functional level of the forest is Windows Server 2003.  
Each office has domain controllers for the forest root domain.  
Each office also contains  
domain controllers for at least one other domain.  
The Contoso network contains an Active Directory forest. The  
forest contains one domain  
named contoso.com. The functional level of the domain is  
Windows Server 2003.

#### Network Infrastructure

The woodgrove Bank network contains the following applications  
and servers:

----

A line-of-business application named Appl.  
Servers that run either Windows Server 2003 or Windows Server  
2008.  
Domain controllers in the main office run Windows Server 2003.  
An enterprise root certification authority (CA) that runs  
Windows Server 2003. The  
certificate revocation list (CRL) is published to an internal  
Web site.  
All client computers in the contoso.com run a 64-bit version of  
Windows 7.

#### Security Model

Users in Woodgrove Bank's research department are required to  
use smart card authenticate to log on to the network.

#### Requirements Planned Changes

Woodgrove Bank plans to implement the following changes:

---  
Provide Contoso users access to Appl.  
Deploy a satellite office that will have one domain controller.  
Provide users in both companies access to the resources in  
either forest by using  
a single set of credentials.

-  
Implement e-mail notification for department managers when new  
versions of shared documents are saved to a network location.

#### Technical Requirements

All users in the planned satellite office must always attempt  
to authenticate to their local domain controller first.

#### Security Requirements

-- - - - -  
Woodgrove Bank must meet the following security requirements:  
Server in contoso.com must be able to trust certificates issued  
by the CA of  
woodgrovebank.com.

Appl must only be available to Contoso users when the users are  
connected to

the Woodgrove Bank network.

Users in contoso.com must be able to automatically enroll for certificates from the

CA of Woodgrove Bank.

Internal auditors must have full administrative rights on all client computers in the finance department.

Only client computers that have Microsoft Forefront EndPoint Protection installed

must be able to remotely connect to the Woodgrove Bank network.
