NEW QUESTION: 1

What factors are best considered when defining the Sprint length?

- A.** Having consistent Sprint length across all Scrum Teams.
- B.** The level of expertise over the technology to be used, ability to release an Increment to the end users, and the risk of being disconnected from the stakeholders.
- C.** How often team membership changes and the size of the Development Team.

Answer: B

NEW QUESTION: 2

Two IS-IS routers are exchanging Hello packets with different authentication types. Which of the following is TRUE?

- A. The two routers negotiate the authentication type and then reach the up state.
- B. Different authentication types are not possible because IS-IS only supports password authentication.
- C. An adjacency will not be formed.
- D. Only an L2 adjacency will form, as long as both routers are L2 capable.

Answer: C

NEW QUESTION: 3

An IT enterprise proceeds with an SOA initiative that is based on the creation of a single enterprise service inventory. However, conflicts arise when different IT departments disagree on who will own the services and how they will be governed. Which of the following alternative approaches could be chosen to address these conflicts?

- A. The top-down approach is chosen. This allows services to be modeled subsequent to their design, thereby enabling each service to be governed by multiple owners.
- B. It is decided to proceed with the creation of multiple domain service inventories. This allows collections of services to be independently governed by different owners, while still enabling the IT enterprise as a whole to transition toward SOA.
- C. Because SOA projects absolutely require enterprise-wide standardization and further demand the creation of an enterprise service inventory, the IT managers have no choice than to cancel the project.
- D. The established "contract last" approach is chosen, allowing different IT managers to focus on contract-related governance issues after the services are deployed and in use.

Answer: B
