NEW QUESTION: 4
HOTSPOT
You need to ensure that new users have timely access to user profile information.
On the Service Applications page, which service application should you configure? (To answer, select the appropriate service application in the answer area.)
Hot Area:

Answer:
Explanation:

Explanation:
Note:
The User Profile service application in SharePoint Server 2013 provides a central location where service administrators configure and administer the following features: *User profiles contain detailed information about people in an organization. A user profile organizes and displays all of the properties related to each user, together with social tags, documents, and other items related to that user.
*Profile synchronization provides a reliable way to synchronize groups and user profile information that is stored in the SharePoint Server 2013 profile database together with information that is stored in directory services across the enterprise.
*Audiences enables organizations to target content to users based on their job or task, as defined by their membership in a SharePoint Server group or distribution list, by the organizational reporting structure, or by the public properties in their user profiles. *My Site Host
a dedicated site for hosting My Sites. A My Site Host is needed in order to deploy the social features of SharePoint Server.
*My Site a personal site that gives users in your organization a central location to manage and store documents, links, and information about colleagues.
*Social tags and notes enables users to add social tags to documents, to other SharePoint Server items, and to other items, such as external web pages and blog posts. Users can also leave notes on profile pages of a My Site or any SharePoint Server page. Administrators can delete all tags for employees when they leave the company or remove a tag they do not want.
