A. Uses a special mechanism to address the 'shoe-shining' effect

B. Requires changes on the backup software

C. A virtual tape cannot span multiple LUNs

D. Uses disk drives as backup media

Virtual Tape Library

A virtual tape library (VTL) has the same components as that of a physical tape library, except that the majority of the components are presented as virtual resources. For the backup software, there is no difference between a physical tape library and a virtual tape library.

Virtual tape libraries use disks as backup media.

Emulation software has a database with a list of virtual tapes, and each virtual tape is assigned space on a LUN. A virtual tape can span multiple LUNs if required. File system awareness is not required while backing up because the virtual tape solution typically uses raw devices.
