Explanation:
Replication between DC1 and DC3 occurs via SiteLink4. By
setting the cost of SiteLink4 to 100 will reduce the time it
takes to replicate Active Directory changes between DC1 and
DC3.

Site link cost can be used to determine which domain controller is contacted by clients in one site if the domain controller for the specified domain does not exist at that site. The client contacts the domain controller by using the site link that has the lowest cost assigned to it.
