* host B 192.168.78.2
* host C 192.168.78.3
* host D 192.168.78.4
* The Finance Web Server has been assigned an address of
172.22.146.17.
* The Public Web Server in the Server LAN has been assigned an
address of 172.22.146.18.

Answer:
Explanation:

Please see below explanation part for details answer steps:
Explanation
We should create an access-list and apply it to the interface
that is connected to the Server LAN because it can filter out
traffic from both S2 and Core networks. To see which interface
this is, use the "show ip int brief" command:

From this, we know that the servers are located on the fa0/1
interface, so we will place our numbered access list here in
the outbound direction.
Corp1#configure terminal
Our access-list needs to allow host C - 192.168125.3 to the
Finance Web Server 172.22.109.17 via HTTP (port 80), so our
first line is this:
Corp1(config)#access-list 100 permit tcp host 192.168.125.3
host 172.22.109.17 eq 80 Then, our next two instructions are
these:
* Other types of access from host C to the Finance Web Server
should be blocked.
* All access from hosts in the Core or local LAN to the Finance
Web Server should be blocked.
This can be accomplished with one command (which we need to do
as our ACL needs to be no more than 3 lines long), blocking all
other access to the finance web server:
Corp1(config)#access-list 100 deny ip any host 172.22.109.17
Our last instruction is to allow all hosts in the Core and on
the local LAN access to the Public Web Server (172.22.109.18)
Corp1(config)#access-list 100 permit ip host 172.22.109.18 any
Finally, apply this access-list to Fa0/1 interface (outbound
direction) Corp1(config)#interface fa0/1 Corp1(config-if)#ip
access-group 100 out Notice: We have to apply the access-list
to Fa0/1 interface (not Fa0/0 interface) so that the
access-list can filter traffic coming from both the LAN and the
Core networks.
To verify, just click on host C to open its web browser. In the
address box type http://172.22.109.17 to check if you are
allowed to access Finance Web Server or not. If your
configuration is correct then you can access it.
Click on other hosts (A, B and D) and check to make sure you
can't access Finance Web Server from these hosts. Then, repeat
to make sure they can reach the public server at 172.22.109.18.
Finally, save the configuration Corp1(config-if)#end Corp1#copy
running-config startup-config
