Prepare for Actual AD0-E313 Adobe Campaign Classic Developer Certified Professional exam efficiently and free of charge, The easy information, provided in the latest Mar 2019 AD0-E313 questions and answers does not prove a challenge to understand and memorise.

#### **NEW QUESTION: 1**

Your network contains a server that has SQL Server 2012 installed. You create a table by using the following script:

You need to recommend a solution to ensure that each combination of ProductName and ProductManufacturer is not duplicated.

What should you recommend creating?

- A. A filtered index
- B. A CHECK constraint
- C. A column store index
- D. A UNIQUE constraint

**Answer: D**

**NEW QUESTION: 2**

To server as family and/or financial planning tool

To provide for retirement

To obtain favorable tax treatment

These are the primary reasons

- A. For naming an institution as trustee
- B. of Custodial
- C. of Safekeeping
- D. For establishing a trust

**Answer: D**

**NEW QUESTION: 3**

You are troubleshooting interface net3 and you enter the following sequence of commands:

Your next command should be:

- A. ipadm create-addr-T static -a 192.168.1.25/24 net3
- B. ipadm up-addrnet3/v4
- C. ipadm create-ip -Tstatic -a 192.168.1.25/24 -n net3
- D. &lt;ipadm create-vnic -a 192.168.1.25/24 net3/v4
- E. ipadm enable-if -T net3

**Answer: A**

Explanation:

If you are assigning a static IP address, use the following syntax:

```
# ipadm create-addr -T static -a address addrobj
```

where addrobj uses the naming format

interface/user-defined-string, such as e1000g0/v4globalz.

Note:

```
create-addr [-t] -T static [-d] -a {local | remote}=addr[/prefixlen],... addrobj
```

Creates a static IPv4 or IPv6 address on the interface specified in addrobj. If the interface on

which the address is created is not plumbed, this subcommand will implicitly plumb the interface.

The created static address will be identified by addrobj.

By default, a configured address will be marked up, so that it can be used as a source or

destination of or for outbound and inbound packets.
