#### **NEW QUESTION: 1**

DRAG DROP

Your network contains an Active Directory domain named contoso.com. The domain contains a file server named Server1. Server1 contains a shared folder named Share1. The domain has Microsoft System Center 2012 Configuration Manager deployed. All client computers run Windows 7.

You plan to upgrade all of the client computers in the marketing department to Windows 8. You will migrate the user settings by using the User State Migration Tool (USMT). You need to capture the user state on each client computer. The solution must exclude offline files from the captured data. Which three actions should you perform?  
To answer, move the three appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

**NEW QUESTION: 2**

Which of the following is correct about XML layout files?

- A. There is no distinction between implementation of the layout definition by code, or by XML layout file.
- B. In an Eclipse project using the ADT plugin, the XML layout file is found in the /res/layout directory.
- C. In order to display a UI defined in the XML layout file "main.xml", call the setContentView method of the Activity with the parameter string "main.xml".
- D. Layout information written in the XML layout file will be converted into code by the Android platform when the screen is displayed.

**Answer: B**
