The latest AWS-Solutions-Architect-Professional exam review materials offered by our Wdh-Namgiang will help you complete the AWS-Solutions-Architect-Professional exam preparation in short time, There is no doubt that you can definitely get more knowledge about relating filed.

NEW QUESTION: 1
Which one of the following will not help overcome communication problems between the Accounting Department and other departments?
A. A performance appraisal prepared by your immediate supervisor.
B. Cross traininand job rotation.
C. Organization-wide social events.
D. Interdepartmental task forces.
Answer: A
Explanation:
Horizontal communication between departments is often subject to more problems than either upward or downward communication within a single department. Examples of these problems include the use of technical terms understood by only one side in the communication process, faulty channel selection, and interpersonal problems. To overcome these difficulties, the sender must encode the message in the context of the receiver's perceptions; that is, the sender mustunderstand the receiver. The sender must establish an interpersonal climate that encourages the elimination of interpersonal barriers to communication. A performance appraisal prepared by the accountant's supervisor will not help the accountant understand the perceptions of people in other departments.

NEW QUESTION: 2
A user is running a batch process on EBS backed EC2 instances. The batch process launches few EC2 instances to process Hadoop Map reduce jobs which can run between 50 ?600 minutes or sometimes for even more time. The user wants a configuration that can terminate the instance only when the process is completed.
How can the user configure this with CloudWatch?
A. Configure the CloudWatch action to terminate the instance when the CPU utilization falls below 5%
B. It is not possible to terminate instances automatically
C. Set up the CloudWatch with Auto Scaling to terminate all the instances
D. Configure a job which terminates all instances after 600 minutes
Answer: A
Explanation:
Explanation/Reference:
Explanation:
Amazon CloudWatch alarm watches a single metric over a time

period that the user specifies and performs one or more actions based on the value of the metric relative to a given threshold over a number of time periods. The user can setup an action which terminates the instances when their CPU utilization is below a certain threshold for a certain period of time. The EC2 action can either terminate or stop the instance as part of the EC2 action.
