NEW QUESTION: 1
Which are the Server Properties of the SAP Afaria Server?
Choose the correct answers
A. Enrollment Code Screen
B. Client Communication Screen
C. Cisco ISE Screen
D. Differencing Screen
Answer: A,C

NEW QUESTION: 2
Which protocols use encryption to protect the confidentiality of data transmitted between two parties? (Choose two.)
A. AAA
B. SSH
C. HTTP
D. Telnet
E. HTTPS
F. FTP
Answer: B,E
Explanation:
Explanation
+ Secure Shell (SSH) provides the same functionality as Telnet, in that it gives you a CLI to a router or switch;
unlike Telnet, however, SSH encrypts all the packets that are used in the session.
+ For graphical user interface (GUI) management tools such as CCP, use HTTPS rather than HTTP because,
like SSH, it encrypts the session, which provides confidentiality for the packets in that session.

Mobility Express is the ability to use an access point (AP) as

a controller instead of a real WLAN controller.
But this solution is only suitable for small to midsize, or
multi-site branch locations where you might not want to invest
in a dedicated WLC. answer 'Autonomous' Mobility Express WLC
can support up to 100 APs.
Mobility Express WLC also uses CAPWAP to communicate to other
APs.
Note: Local mode is the most common mode that an AP operates
in. This is also the default mode. In local mode, the LAP
maintains a CAPWAP (or LWAPP) tunnel to its associated
controller.
