Answer: D,E
Explanation:
In order for the tunnel to be established between R2-R5 ,the R2
should have a path for the 5.5.5.5/32 route in its own routing
table , and because the ospf is the only routing protocol here
, so R5 has to advertise the route 5.5.5.5/32, and that is
possible through these option:
1-redistribute connected route to ospf on R5
2-Advertise interface lo0 to OSPF on R5
For knowing more about the rules for the gre channel to be
established, check the link below:
http://www.cisco.com/c/en/us/support/docs/ip/generic-routing-en
