If you cannot receive our C-THR97-2205 study materials which are updated at a regular time, it is more likely that your computer system regards our email as the junk mail.

NEW QUESTION: 1

A group policy requires users in an organization to use strong passwords that must be changed every 15 days. Joe and Ann were hired 16 days ago. When Joe logs into the network, he is prompted to change his password; when Ann logs into the network, she is not prompted to change her password. Which of the following BEST explains why Ann is not required to change her password?

A. Ann's user account has administrator privileges.

B. Joe's user account was inadvertently disabled and must be re-created.

C. Joe's user account was not added to the group policy.

D. Ann's user account was not added to the group policy.

Answer: D

Explanation:

Group policy is used to manage Windows systems in a Windows network domain environment by means of a Group Policy Object (GPO). GPO's include a number of settings related to credentials, which includes password expiration.

Because Anne was not prompted to change her password, it could only mean that her user account was not added to the group policy.

Incorrect Answers:

A. Even if Ann's user account has administrator privileges, if it was added to the group policy it would meet the requirements of the group policy.

B. If Joe's user account was not added to the group policy, his account would not be required to meet the requirements of the group policy.

D. If Joe's user account was inadvertently disabled and must be re-created, he would not be prompted to change his password at logon.
