D. EFS Infrequent Access (IA)

Answer: D

**NEW QUESTION: 2**

Employees are permitted to bring personally owned portable Windows 10 Enterprise computers to the office. They are permitted to install corporate applications by using the management infrastructure agent and access corporate email by using the Mail app.

An employee's personally owned portable computer is stolen. You need to protect the corporate applications and email messages on the computer.

Which two actions should you perform? Each correct answer presents part of the solution.

- A. Disconnect the computer from the management infrastructure.
- B. Prevent the computer from connecting to the corporate wireless network.
- C. Change the user's password.
- D. Initiate a remote wipe.

Answer: C,D

Explanation:

The personally owned portable Windows 10 Enterprise computers being managed by the management infrastructure agent enables the use of remote wipe. By initiating a remote wipe, we can erase all company data including email from the stolen device. Microsoft Intune provides selective wipe, full wipe, remote lock, and passcode reset capabilities. Because mobile devices can store sensitive corporate data and provide access to many corporate resources, you can issue a remote device wipe command from the Microsoft Intune administrator console to wipe a lost or stolen device.

Changing the user's password should be the first step. If the stolen computer is accessed before the remote wipe happens, the malicious user could be able to access company resources if the laptop has saved passwords.

**NEW QUESTION: 3**

Which of the following DoD policies establishes policies and assigns responsibilities to achieve DoD IA through a defense-in-depth approach that integrates the capabilities of personnel, operations, and technology, and supports the evolution to network-centric warfare?

- A. DoD 8500.2 Information Assurance Implementation
- B. DoD 8500.1 Information Assurance (IA)
- C. DoDI 5200.40
- D. DoD 8510.1-M DITSCAP

Answer: B

## Explanation:

DoD 8500.1 Information Assurance (IA) sets up policies and allots responsibilities to achieve DoD IA through a defense-in-depth approach that integrates the capabilities of personnel, operations, and technology, and supports the evolution to network-centric warfare. DoD 8500.1 also summarizes the roles and responsibilities for the persons responsible for carrying out the IA policies. Answer D is incorrect. The DoD 8500.2 Information Assurance Implementation pursues 8500.1. It provides assistance on how to implement policy, assigns responsibilities, and prescribes procedures for applying integrated, layered protection of the DoD information systems and networks. DoD Instruction 8500.2 allots tasks and sets procedures for applying integrated layered protection of the DOD information systems and networks in accordance with the DoD 8500.1 policy. It also provides some important guidelines on how to implement an IA program. Answer A is incorrect. DoDI 5200.40 executes the policy, assigns responsibilities, and recommends procedures under reference for Certification and Accreditation(C&A) of information technology (IT). Answer C is incorrect. DoD 8510.1-M DITSCAP provides standardized activities leading to accreditation, and establishes a process and management baseline.
