NEW QUESTION: 1
You have been requested to use CloudFormation to maintain

version control and achieve automation for the
applications in your organization. How can you best use
CloudFormation to keep everything agile and
maintain multiple environments while keeping cost down?
A. Combine all resources into one template for version control
and automation.
B. Create separate templates based on functionality, create
nested stacks with CloudFormation.
C. Use CloudFormation custom resources to handle dependencies
between stacks
D. Create multiple templates in one CloudFormation stack.
Answer: B
Explanation:
Explanation
As your infrastructure grows, common patterns can emerge in
which you declare the same components in each
of your templates. You can separate out these common components
and create dedicated templates for them.
That way, you can mix and match different templates but use
nested stacks to create a single, unified stack.
Nested stacks are stacks that create other stacks. To create
nested stacks, use the AWS:: Cloud Form
ation::Stackresource in your template to reference
other templates. For more information on Cloudformation best
practises please refer to the below link:
