## Answer :

Explanation:

Explanation:

The ALTER DATABASE with MODIFY FILE command can make a file size bigger (but not smaller).

Example:

```
ALTER DATABASE AdventureWorks2012  
MODIFY FILE  
(NAME = test1dat3,  
SIZE = 200MB);
```

Note: MODIFY FILE

Specifies the file that should be modified. Only one <filespec> property can be changed at a time. NAME must always be specified in the <filespec> to identify the file to be modified. If SIZE is specified, the new size must be larger than the current file size.
