database of confidential data.
You need to enable Transparent Data Encryption.
Which four actions should you perform in sequence? To answer,
move the appropriate actions from the list of actions to the
answer area and arrange them in the correct order.

Answer:
Explanation:

Explanation

The steps to setup TDE are:
Step 1: Create a master key
We must first create the master key. It must be created in the
master database.
Example:
USE master;
GO
CREATE MASTER KEY ENCRYPTION BY PASSWORD =
'<UseStrongPasswordHere>';
go

Step 2: Create or obtain a certificate protected by the master key
Once the master key is created, we will go ahead and create the actual certificate in the master database, not the user database.
Example:
CREATE CERTIFICATE MyServerCert WITH SUBJECT = 'My DEK Certificate';
go
USE AdventureWorks2012;
GO
Step 3: Create a database encryption key and protect it by the certificate Now, we must utilize our USE command to switch to the database, the user database, that we wish to encrypt.
Then we create a connection or association between the certificate that we just created and the actual database.
Example:
USE <DB>
GO
CREATE DATABASE ENCRYPTION KEY
WITH ALGORITHM = AES_256
ENCRYPTION BY SERVER CERTIFICATE TDE_Cert;
GO
Step 4: Set the database to use encryption
Example:
ALTER DATABASE AdventureWorks2012
SET ENCRYPTION ON;
GO
