Answer: A

NEW QUESTION: 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains multiple Hyper-V hosts.

You need to deploy several critical line-to-business applications to the network to meet the following requirements:

*The resources of the applications must be isolated from the physical host.

*Each application must be prevented from accessing the resources of the other applications.

*The configurations of the applications must be accessible only from the operating system that hosts the application.

Solution: You deploy a separate Hyper-V container for each application.

Does this meet the goal?

- A. No
- B. Yes

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/virtualization/windowscontainers/about/>

-The resources of the applications must be isolated from the physical host (ACHIEVED)- Each application must be prevented from accessing the resources of the other applications.

(ACHIEVED)-The configurations of the applications must be accessible only from the operating system that hosts the application. (ACHIEVED)
