NEW QUESTION: 4

Your network contains a System Center 2012 Configuration Manager environment.

You are creating a configuration item that contains application settings for Microsoft Office 2010.

You need to detect whether Office 2010 is installed before validating the configuration item.

What should you do?

A. Create a report to display all installed software.

B. Create a query-based collection.

C. Enable Use Windows Installer detection.

D. Create an automatic deployment rule.

Answer: C

Explanation:

Compliance settings contains tools to help you assess the compliance of users and client devices for many configurations, such as whether the correct Windows operating system versions are installed and configured appropriately, whether all required applications are installed and configured correctly, whether optional applications are configured appropriately, and whether prohibited applications are installed.

Note: Compliance settings in System Center 2012 Configuration Manager provides a unified interface and user experience that

lets you manage the configuration and compliance of servers, laptops, desktop computers, and mobile devices in your organization.
