Answer: A

NEW QUESTION: 2
To which technique for dealing with risk and uncertainty do ALL of the following statements apply?
* It requires that only one factor is considered at a time.
* It identifies areas which are crucial to a project, which can then be monitored if the project is chosen.
* It does not provide an indication of the likelihood of any change in the factors.
* Following the calculation, it requires the exercising of judgement to decide whether to accept or reject a project.
A. Adjusting the discount rate to reflect risk.
B. Sensitivity analysis
C. Probability analysis
D. Scenario analysis
Answer: B

NEW QUESTION: 3
An online gaming site asked you if you can deploy a database that is a fast, highly scalable NoSQL database service in AWS for a new site that he wants to build. Which database should you recommend?
A. Amazon SimpleDB
B. Amazon RDS
C. Amazon DynamoDB
D. Amazon Redshift
Answer: C
Explanation:
Amazon DynamoDB is ideal for database applications that require very low latency and predictable performance at any scale but don't need complex querying capabilities like joins or transactions. Amazon DynamoDB is a fully-managed NoSQL database service that offers high performance, predictable throughput and low cost. It is easy to set up, operate, and scale.
With Amazon DynamoDB, you can start small, specify the throughput and storage you need, and easily scale your capacity requirements on the fly. Amazon DynamoDB automatically partitions data over a number of servers to meet your request capacity. In addition, DynamoDB automatically replicates your data synchronously across multiple Availability Zones within an AWS Region to ensure high-availability and data durability.

NEW QUESTION: 4
HOTSPOT
On a DNS server that runs Windows Server 2016, you plan to create two new primary zones named adatum.com and contoso.com.
You have the following requirements for the zones:
* Ensure that computers on your network can register records automatically in the adatum.com zone.
* Ensure that records that are stale for two weeks are purged automatically from the contoso.com zone.
What command should you run? To answer, select the appropriate options in the answer area.

Answer:
Explanation:

Explanation:

Set-DnsServerForwarder -UseRootHint $false
