Ref:
https://docs.oracle.com/en/cloud/saas/project-portfolio-managem
ent/19b/oapfm/project-foundation-configuration Why can't I find
persons in the list of resources when I enter team members,
planning resources, or person rate schedules?
You can't find persons in the list of resources when you enter
team members, planning resources, or person rate schedules in
the following situations:
* The administrator didn't assign a department while creating
users. Persons must have an active assignment and be assigned
to a department in Oracle Fusion Human Capital Management
before they can be added as team members or entered as
resources on the planning resource breakdown structure or
person rate schedule.
* The resource isn't active in Oracle Fusion Human Capital
Management because the current date is before the effective
date of the resource. If you want to include persons who will
start in the future, select the Include people with
future-dated effective start dates option when you search for
the person.
* Persons assigned as project managers aren't active as of the
project start date.
* The assignment of the person is terminated, and an
appropriate value isn't set for the number of days to display
people with terminated assignments. You can set the profile

value appropriately at the site profile level using the Specify Number of Days to Display People with Terminated Assignments task in the Setup and Maintenance work area.

NEW QUESTION: 3
You have a Microsoft Exchange Online subscription that uses a namespace of litwareinc.com.
You create a connector in Exchange Online that is configured as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 4
Was entmutigt das ITIL-Service-Value-System?
A. Organisatorische Agilität
B. Organisationssilos
C. Schnittstellen zwischen Praktiken
D. Koordinierte Behörden und Verantwortlichkeiten
Answer: B
Explanation:
Architecture of the ITIL SVS specifically enables flexibility and discourages siloed working. This is because the service value chain and practices do not form a fixed, rigid structure, but rather they can be combined in multiple value streams to address the needs of the organization in a variety of scenarios, with open flow of communication across the many interfaces.
