Our product is elaborately composed with major questions and answers, Now, we have launched some popular MKT-101 training prep to meet your demands, There is no doubt that you can rely on MKT-101 real dumps and receive the exam pass.

Pass MKT-101 Exam with Salesforce MKT-101 Exam Dumps in First Attempt, Whether you are using our real exam questions in PDF file format, Wdh-Namgiang is also providing a 100% money back guarantee on MKT-101 test simulator dumps.

NEW QUESTION: 1

Which of the following tools is used for the 802.11 HTTP, HTTPS based MITM attacks?

- A. Ettercap
- B. AirJack
- C. dsniff
- D. wsniff

Answer: D

NEW QUESTION: 2

A company has a Microsoft System center virtual machine manager (SCVMM) environment. The company also uses System center operations manager (SCOM). You integrate SCVMM with SCOM. You need to ensure that alerts, notifications and monitoring is synchronizing between SCVMM and SCOM.

What should you do?

- A. Install the SCOM console on the SCVMM management server
- B. Install the SCOM agent on the SCVMM management server
- C. Enable maintenance and mode integration
- D. Enable performance and resource optimization (PRO)

Answer: D

Explanation:

Explanation/Reference:

Explanation:

PRO information is provided by Operations Manager, and can be VMM to optimize performance. You can map specific Operations Manager alerts to remedial actions in VMM. For example, you could migrate VMs to a different host after a hardware issue. In addition, with PRO enabled, Operations Managers can detect resource issues or hardware failures in the virtualization infrastructure.

NEW QUESTION: 3

When using a PaaS solution, what is the capability provided to the customer?

- A. To deploy onto the cloud infrastructure consumer-created or acquired applications created using programming languages, libraries, services, and tools that the provider supports. The consumer does not manage or control the underlying cloud infrastructure, including network, servers, operating systems, or storage, but has control over the deployed applications and possibly configuration settings for the application-hosting environment.
- B. To deploy onto the cloud infrastructure provider-created or acquired applications created using programming languages, libraries, services, and tools that the provider supports. The consumer does not manage or control the underlying cloud infrastructure, including network, servers, operating systems, or storage, but has control over the deployed applications and possibly configuration settings for the application-hosting environment.
- C. To deploy onto the cloud infrastructure consumer-created or acquired applications created using programming languages, libraries, services, and tools that the consumer supports. The consumer does not manage or control the underlying cloud infrastructure, including network, servers, operating systems, or storage, but has control over the deployed applications and possibly configuration settings for the application-hosting environment.
- D. To deploy onto the cloud infrastructure consumer-created or acquired applications created using programming languages, libraries, services, and tools that the provider supports. The provider does not manage or control the underlying cloud

infrastructure, including network, servers, operating systems, or storage, but has control over the deployed applications and possibly configuration settings for the application-hosting environment.

Answer: A

Explanation:

Explanation/Reference:

Explanation:

According to "The NIST Definition of Cloud Computing," in PaaS, "the capability provided to the consumer is to deploy onto the cloud infrastructure consumer-created or acquired applications created using programming languages, libraries, services, and tools supported by the provider. The consumer does not manage or control the underlying cloud infrastructure including network, servers, operating systems, or storage, but has control over the deployed applications and possibly configuration settings for the application-hosting environment.

NEW QUESTION: 4

Multi-channel cascaded conference, in the main MCU 3 terminals 2Mbps enter the conference, from MCU 3 terminals 3Mbps enter the conference, and each cascade channel bandwidth is 2Mbps.

A. TRUE

B. FALSE

Answer: B
