NEW QUESTION: 2

- A. Option D
- B. Option C
- C. Option A
- D. Option B

Answer: A

Explanation:

Troubleshooting deadlocks

You have been receiving reports from users indicating that certain applications are

returning deadlock errors. To maximize the effectiveness of troubleshooting these

problems, you decide to focus on the deadlocks that are hit most frequently. You create an

Extended Events session that:

/ Configures deadlock event tracking for the session.

/ Specifies a target that aggregates based on an identifier for the deadlock.

You run the Extended Events session, and after additional deadlocks are reported you are

able to obtain aggregated deadlock information, along with the complete XML deadlock

graph for each source. Using this information you are able to pin point the most common

deadlocks and start working on a solution.
