**Answer: C**

**NEW QUESTION: 3**

Reconnaissance: This is the discovery process used to find information about the network. It could include scans of the network to find out which IP addresses respond, and further scans to see which ports on the devices at these IP addresses are open. This is usually the first step taken, to discover what is on the network and to determine potential vulnerabilities.

- A. Scans of the network to find out which IP addresses respond, and further scans to see which ports on the devices at these IP addresses are open.
- B. Scans of the network to find out which IP addresses respond, and further scans to see which ports on the devices at these IP addresses are open.
- C. Scans of the network to find out which IP addresses respond, and further scans to see which ports on the devices at these IP addresses are open.
- D. Scans of the network to find out which IP addresses respond, and further scans to see which ports on the devices at these IP addresses are open.

**Answer: D**

Explanation:

Explanation

Reconnaissance: This is the discovery process used to find information about the network. It could include scans of the network to find out which IP addresses respond, and further scans to see which ports on the devices at these IP addresses are open. This is usually the first step taken, to discover what is on the network and to determine potential vulnerabilities.
