NEW QUESTION: 1

Which of the following ISO standard defines file systems and

protocol for exchanging data between optical disks?

- A. ISO/IEC 13940
- B. ISO 9660
- C. IEC 3490
- D. ISO 9060

Answer: B

NEW QUESTION: 2

The unit of measurement, target value, accuracy, and upper and lower specification limits are defined for each tolerance key.

- A. Correct
- B. Incorrect

Answer: A

NEW QUESTION: 3

- A. Option B
- B. Option C
- C. Option A
- D. Option D

Answer: C

Explanation:

First we should check Branch3 (and R1) with the "show ip interface brief" command to find any Layer1/Layer 2 issue.

We see the interfaces connecting between them are in "up/down" states which indicates an Layer 2 issue so we should check the configuration of these interfaces carefully with the "show running-config" command and pay attention to these interfaces.

and on Branch3:

We learn from above config is R1 is using CHAP to authenticate Branch3 router (via the "ppp authentication chap" command on R1). Branch3 router is sending CHAP hostname "Branch_3" and CHAP password "Branch3_Secret!" to R1 to be authenticated. Therefore we should check if R1 has already been configured with such username and password or not with the "show running-config" command on R1:

On R1 we see the configured username is "Branch3", not "Branch_3" so the usernames here are mismatched and this is the

problem -> Answer A is correct.
