You will absolutely pass the exam, This is [Reliable IPQ-435 Mock Test](#) built on our in-depth knowledge of our customers, what they want and what they need.

NEW QUESTION: 1

Your network contains one Active Directory forest named contoso.com. The forest contains two child domains named east.contoso.com and west.contoso.com.

Your user account is a member of the Domain Admins group in all of the domains. The account is not a member of any other groups.

The contoso.com domain contains a Group Policy object (GPO) named DesktopGPO.

DesktopGPO is applied to the following containers.

- * An organizational unit (OU) named ALLUsers in contoso.com
- * An OU named Marketing in east.contoso.com
- * The east.contoso.com domain
- * The contoso.com domain
- * A site named Corporate

You delete DesktopGPO.

You need to identify which Group Policy links must be removed manually.

Which three GPO links should you identify? Each correct answer presents part of the solution.

A. the Marketing OU in east.contoso.com

- B. the AllUsers OU in contoso.com
- C. the contoso.com domain
- D. the east.contoso.com domain
- E. a site named Corporate

Answer: A,D,E

Explanation:

When you delete a GPO, Group Policy Management attempts to delete all links to that GPO in the domain of the GPO. However, to delete a link to a GPO, you must have permission to link Group Policy objects for the organizational unit or domain. If you do not have rights to delete a link, the GPO will be deleted, but the link will remain. Links from other domains and sites are not deleted. The link to a deleted GPO appears in Group Policy Management as Not Found.

Reference: Create or delete a Group Policy object

NEW QUESTION: 2

You have a server named EX01 that runs Exchange Server 2016. The disks on EX01 are configured as shown in the following table.

All users access their email by using Microsoft Outlook 2013. From Performance Monitor, you discover that the MSExchange Database\I/O Database Reads Average Latency counter displays values that are higher than normal.

You need to identify the impact of the high counter values on user connections in the Exchange Server organization.

What are two client connections that will report slower performance when opening email messages? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. mobile devices using Exchange Active Sync
- B. Outlook in Online Mode
- C. Outlook in Cached Exchange Mode
- D. IMAP4 clients
- E. Outlook on the web

Answer: B,E

NEW QUESTION: 3

DRAG DROP

Answer:

Explanation:
