Answer: A

NEW QUESTION: 2
Your company set up a complex organizational structure on
Google Could Platform. The structure includes hundreds of
folders and projects. Only a few team members should be able to
view the hierarchical structure.
You need to assign minimum permissions to these team members
and you want to follow Google-recommended practices. What
should you do?
A. Add the users to a group, and add this group to
roles/iam.roleViewer role.
B. Add the users to a group, and add this group to
roles/browser role.
C. Add the users to roles/browser role.
D. Add the users to roles/iam.roleViewer role.
Answer: C

NEW QUESTION: 3
You deploy a Microsoft Azure SQL Data Warehouse instance. The
instance must be available eight hours each day.
You need to pause Azure resources when they are not in use to
reduce costs.
What will be the impact of pausing resources? To answer, select
the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:
Explanation:

Explanation

To save costs, you can pause and resume compute resources
on-demand. For example, if you won't be using the database
during the night and on weekends, you can pause it during those
times, and resume it during the day. You won't be charged for
DWUs while the database is paused.
When you pause a database:
Compute and memory resources are returned to the pool of
available resources in the data center Data Warehouse Unit
(DWU) costs are zero for the duration of the pause.
Data storage is not affected and your data stays intact.
SQL Data Warehouse cancels all running or queued operations.
When you resume a database:
SQL Data Warehouse acquires compute and memory resources for
your DWU setting.
Compute charges for your DWUs resume.

Your data will be available.
You will need to restart your workload queries.
