NEW QUESTION: 1

Which testing approach is MOST appropriate to ensure that internal application interface errors are identified as soon as possible?

- A. Bottom up
- B. Sociability testing
- C. Top-down
- D. System test

Answer: C

Explanation:

The top-down approach to testing ensures that interface errors

are detected early and that testing of major functions is conducted early. A bottom-up approach to testing begins with atomic units, such as programs and modules, and works upward until a complete system test has taken place. Sociability testing and system tests take place at a later stage in the development process.

NEW QUESTION: 2

:Which of the following command line statements will configure an IP address on the default VLAN?
