NEW QUESTION: 3

An administrator is evaluating whether to deploy vCenter Server on a Windows server or on a vCenter Server appliance. The administrator has the following requirements:

- A web browser will be utilized to manage the vSphere environment.
- 16 ESXi hosts will be deployed.
- Licenses must be shared with a vCenter Server at another site.
- An external Oracle 10g database server will be used to host the vCenter Server database.

Why will the administrator need to deploy vCenter Server on a Windows server?

- A. Management of more than 5 hosts is a requirement for the solution.
- B. Oracle 10g is a requirement for the solution.
- C. Linked Mode is a requirement for the solution.
- D. The vSphere web client is a requirement for the solution.

Answer: C

Explanation:

Explanation

Since licenses will be shared with a vCenter Server at another site, linked mode would be required. Link mode joins multiple vCenter Server sites and allows them to share information.
