We are growing larger and larger, we have many old customers, and we attach importance to word of mouth, Many people think that passing the Salesforce TVB-201 exam needs a lot of time to learn the relevant knowledge.

**NEW QUESTION: 1**

What is the best way to clean the IBM AnyPlace Kiosk touch screen?

- A. use isopropyl alcohol or a mild liquid glass cleaner and a soft cloth
- B. use a chlorine-based window cleaner and a soft cloth
- C. use an ammonia-based window cleaner and a soft cloth
- D. use a damp sponge moistened with hot water and a small amount of mildly abrasive cleaner

**Answer: A**

**NEW QUESTION: 2**

Your network contains an Active Directory domain named contoso.com. All domain controllers run Windows Server 2012 R2. One of the domain controllers is named DC1. The DNS zone for the contoso.com zone is Active Directory-integrated and has the default settings. A server named Server1 is a DNS server that runs a UNIX-based operating system.

You plan to use Server1 as a secondary DNS server for the contoso.com zone.

You need to ensure that Server1 can host a secondary copy of the contoso.com zone.

What should you do?

- A. From DNS Manager, modify the Advanced settings of DC1.
- B. From Windows PowerShell, run the Set-DnsServerForwarder cmdlet and specify the contoso.com zone as a target.
- C. From DNS Manager, modify the Zone Transfers settings of the contoso.com zone.
- D. From DNS Manager, modify the Security settings of DC1.

**Answer: B**

Explanation:

There are two ways that a secondary DNS server can be added. In both scenarios you will need to add the new server to the Forwarders list of the primary Domain Controller.

1.The Set-DnsServerForwarder cmdlet changes forwarder settings on a Domain Name System (DNS) server.

2.From the primary server, open DNS Manager, right click on the server name and select Properties. Click on the Forwarders tab and click the Edit button in the middle of the dialogue box.

**NEW QUESTION: 3**

An administrator is planning to install a new WPAR and intends to use Live Application

Mobility between source and target Power Systems servers.

What must be considered when configuring the storage layout of the WPAR?

- A. The /opt, /usr and /proc filesystems must be backed by NFS storage on a WPAR.
- B. NFS filesystems must be available on the source and target global environments and the WPAR.
- C. Shared NPIV storage must be mapped to both source and target systems.
- D. NPIV backed SAN devices must be mapped to the global environment on the source and target servers.

**Answer: B**
