With increasing development of our company, we can keep high passing rate of 350-501 guide torrent files so many years, Free updates on the 350-501 braindumps for 12 Months.

The money you have paid for our 350-501 pass-for-sure materials is proportional to the values.

NEW QUESTION: 1

George has launched three EC2 instances inside the US-East-1a zone with his AWS account. Ray has launched two EC2 instances in the US-East-1a zone with his AWS account. Which of the below mentioned statements will help George and Ray understand the availability zone (AZ) concept better?

- A. All the instances of George and Ray can communicate over a private IP with a minimal cost
- B. The US-East-1a region of George and Ray can be different availability zones
- C. The instances of George and Ray will be running in the same data centre
- D. All the instances of George and Ray can communicate over a private IP without any cost

Answer: B

Explanation:

Each AWS region has multiple, isolated locations known as Availability Zones. To ensure that the AWS resources are distributed across the Availability Zones for a region, AWS independently maps the Availability Zones to identifiers for each account. In this case the Availability Zone US-East-1a where George's EC2 instances are running might not be the same location as the US-East-1a zone of Ray's EC2 instances. There is no way for the user to coordinate the Availability Zones between accounts.
