And our professional experts are the most specialized people in this career to help us pass the ANS-C00-KR exam, Downloadable, printable exams (in PDF format), However, our ANS-C00-KR real questions are high efficient priced with reasonable amount, acceptable to exam candidates around the world.

100% Pass 2022 The Best Amazon ANS-C00-KR: AWS Certified Advanced Networking Specialty (ANS-C00) Exam (AWS-Advanced-Networking-Specialty Korean Version) Popular Exams

If you use the PDF version you can print our ANS-C00-KR test torrent on the papers and it is convenient for you to take notes, Amazon knowledge is also emerging at the same time.

As we all know, a wise choice of ANS-C00-KR test cram: AWS Certified Advanced Networking Specialty (ANS-C00) Exam (AWS-Advanced-Networking-Specialty Korean Version) is of great significance, High passing rate of Wdh-Namgiang questions and answers is certified by many more candidates.

With a high pass rate as 98% to 100%, you [ANS-C00-KR](#) will be bound to pass the exam, Hope you can be one of the beneficiaries of our products soon, As long as you carefully study the questions in the ANS-C00-KR latest exam simulator, all problems can be solved.

Most candidates can clear exam casually with our exam braindumps one-shot, In order to provide the most effective ANS-C00-KR exam materials which cover all of the current events for our customers, a group of experts in our company always keep an close eye on the changes of the ANS-C00-KR exam even the smallest one, and then will compile all of the new key points as well as the latest types of exam questions into the new version of our ANS-C00-KR practice test, and you can get the latest version of our study materials for free during the whole year.

NEW QUESTION: 1

You need to update a database accessed by an application that uses a WebLogic server data source. It has been decided that the data source on WLS should first be shut down. You have been asked to advise as to whether they should execute a shutdown() or a forceShutdown() on the corresponding JDBCDataSourceRuntimeMBean.

Which two statements are true regarding the impact on the application that is using that data source? (Choose two.)

A. The shutdown() operation will send an HTTP 503 status code to clients.

B. The `forceShutdown()` operation will allow 20 seconds for any reserved connections in use to complete prior to destroying the connection.

C. The `shutdown()` operation will allow 20 seconds for any reserved connections in use to complete, otherwise the operation will fail.

D. The `shutdown()` operation will fail if there are any reserved connections in use.

E. The `forceShutdown()` operation will immediately cause any in-flight transaction to be rolled back.

Answer: D,E

Explanation:

A: When you shut down a data source (not forcibly shut down), WebLogic Server closes database connections in the data source and shuts down the data source. If any connections from the data source are currently in use, the operation will fail.

D: When you forcibly shut down a data source, WebLogic Server closes database connections in the data source and shuts down the data source. All current connection users are forcibly disconnected.

NEW QUESTION: 2

What happens when you attempt to compile and run the following code?

```
#include <vector>
#include <iostream>
#include <algorithm>
#include <functional>
using namespace std;
class B { int val;
public:
B(int v=0):val(v){}
int getV() const {return val;}
operator int () const { return val; } };
template<class T>struct Out {
ostream & out;
Out(ostream & o): out(o){}
void operator() (const T & val ) { out<<val<<"
"; } };
int main() {
B t[]={3,2,4,1,5,6,10,8,7,9};
vector<B> v1(t, t+10);
for_each(v1.begin(), v1.end(), bind1st(plus<B>(), 1));
for_each(v1.rbegin(), v1.rend(),
Out<B>(cout));cout<<endl;
return 0;
}
```

Program outputs:

A. 10 8 9 11 7 6 2 5 3 4

B. 3 2 4 1 5 6 10 8 7 9

- C. 9 7 8 10 6 5 1 4 2 3
- D. 4 3 5 2 6 7 11 9 8 10
- E. compilation error

Answer: C
