**A.** Option B
**B.** Option A
**C.** Option C
**D.** Option D
**Answer: A,C**
Explanation:
Basics of RESTful services:
REST stands for Representational State Transfer, it is a simple
stateless architecture that runs over HTTP where each unique
URL is representation of some resource. There are four basic
design principles which should be followed when creating
RESTful service:
* Use HTTP methods (verbs) explicitly and in consistent way to
interact with resources (Uniform Interface), i.e. to retrieve a
resource use GET, to create a resource use POST, to update a
resource use PUT/PATCH, and to remove a resource use DELETE.
Etc.
