NEW QUESTION: 1

Katie developed her corporation's intra net site using proprietary HTML language extensions based on the company's current browser. The company has recently updated its systems to include the use of a new browser. Now the intra net site that Katie developed no longer renders its content consistently. What should Katie do to ensure that this site's content renders consistently regardless of the browser used?

- A.** Update the site using a single language standard consistently, such as HTML5 or XHTML.
- B.** Revise the site to include workarounds and hacks for the new browser.
- C.** Revise the site's markup language in only those areas that are not rendering properly.
- D.** Update the site using the proprietary language extensions required by the new browser's rendering engine.

Answer: A

Answer: A

Explanation:

Explanation

<https://docs.aws.amazon.com/AWSEC2/latest/UserGuide/instancedata-a-data-categories.html> Data: local-hostname Descriptions: The private IPv4 DNS hostname of the instance. In cases where multiple network interfaces are present, this refers to the eth0 device (the device for which the device number is 0). Data: public-ipv4 Descriptions: The public IPv4 address. If an Elastic IP address is associated with the instance, the value returned is the Elastic IP address.

NEW QUESTION: 3

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You have a Hyper-V host named Server1 that runs Windows Server 2016. Server1 has a virtual machine that uses a virtual hard disk (VHD) named disk1.vhdx.

You receive the following warning message from Event Viewer: "One or more virtual hard disks have a physical sector size that is smaller than the physical sector size of the storage on which the virtual hard disk file is located." You need to resolve the problem that causes the warning message.

What should you run?

- A.** the Set-VHD cmdlet
- B.** the Set-VMProcessor cmdlet
- C.** the Set-VM cmdlet
- D.** the Mount-VHD cmdlet
- E.** the Set-VMHost cmdlet
- F.** the Optimize-VHD cmdlet
- G.** the Diskpart command
- H.** the Install-WindowsFeature cmdlet

Answer: A

Explanation:

Issue

One or more virtual hard disks have a physical sector size that

is smaller than the physical sector size of the storage on which the virtual hard disk file is located.

Resolution

Do one of the following:

The Set-VHD cmdlet sets the ParentPath or PhysicalSectorSizeBytes properties of a virtual hard disk. The two properties must be set in separate operations.

The Set-VHD -PhysicalSectorSizeBytes parameter specifies the physical sector size, in bytes. Valid values are 512 and 4096. This parameter is supported only on a VHDX-format disk that is not attached when the operation is initiated.
