Each operating system or application may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)
Select and Place:

Answer:
Explanation:

Explanation:
Server Layer, Web Operation System: Windows Server 2008 R2 SP1
Application: .NET Framework 4.5
Server Layer, Application Operation System: Windows Server 2008 R2 SP1 Application: .NET Framework 4.5
Server Layer, Database Operation System: Windows Server 2008 R2 SP1 Application: SQL Server 2008 R2 SP1
Note:
*From scenario: Install the minimum supported versions of all software on the servers.
*Minimum requirements for a single server with built-in

database: include:
The 64-bit edition of Windows Server 2008 R2 Service Pack 1
(SP1) Standard, Enterprise, or Datacenter or the 64-bit edition
of Windows Server 2012 Standard or Datacenter
Microsoft .NET Framework version 4.5
Microsoft SQL Server 2008 R2 SP1

NEW QUESTION: 3
What is the difference between Access Control Lists (ACLs) and
Capability Tables?
A. Access control lists are related/attached to a subject
whereas capability tables are related/attached to an object.
B. Capability tables are used for objects whereas access
control lists are used for users.
C. They are basically the same.
D. Access control lists are related/attached to an object
whereas capability tables are related/attached to a subject.
Answer: D
Explanation:
Explanation/Reference:
Explanation:
A capability table stipulates the access rights that a
specified subject has in relation to detailed objects.
Access control lists defines subjects that are authorized to
access a specific object, and includes the level of
authorization that subjects are granted.
Therefore, the difference between the two is that the subject
is bound to the capability table, while the object is bound to
the ACL.
Incorrect Answers:
A: This is incorrect as access control lists are
related/attached to an object, and capability tables are
related/attached to a subject.
C: This is incorrect as access control lists are used for
objects, and capability tables are for subjects.
D: access control lists and capability tables are not basically
the same because one is bound to objects, and the other is
bound to subjects.
