If you fail to pass the exam, we will give [Certification HPE0-J69 Sample Questions](#) a full refund, After learning our learning materials, you will benefit a lot.

NEW QUESTION: 1

A. Option C

- B. Option D
- C. Option A
- D. Option B

Answer: B

Explanation:

Explanation

You can't create templates or configure auto-enrollment on a standalone CA.

NEW QUESTION: 2

HOTSPOT

Your network contains an Active Directory domain named contoso.com. The domain contains a domain controller named DC1 and a member server named Server1. All servers run Windows Server

2012 R2.

You install the IP Address Management (IPAM) Server feature on Server1.

From the Provision IPAM wizard, you select the Group Policy Based provisioning method and enter a GPO name prefix of IPAM1. You need to provision IPAM by using Group Policy.

What command should you run on Server1 to complete the process? To answer, select the appropriate options in the answer area.

Answer:

Explanation:

The Invoke-IPAMGPOProvisioning cmdlet creates and links three group policies specified in the Domain parameter for provisioning required access settings on the server roles managed by the computer running the IP Address Management (IPAM) server.

Reference: Invoke-IPAMGPOProvisioning

NEW QUESTION: 3

Which three are considered as technical constraints when identifying network requirements? (Choose three.)

- A. policy limitations
- B. support for existing legacy equipment
- C. support for legacy applications
- D. limited budget allocation
- E. bandwidth support for new applications
- F. limited timeframe to implement
- G. limited support staff to complete assessment

Answer: B,C,E

Explanation:

Network design might be constrained by parameters that limit the solution. Legacy applications might still exist that must

be supported going forward, and these applications might require a legacy protocol that may limit a design. Technical constraints include the following:

Existing wiring does not support new technology.

Bandwidth might not support new applications.

The network must support exiting legacy equipment.

Legacy applications must be supported (application compatibility).
