There are a lot of advantages of our NSE6_FAD-6.2 study materials, and then, I am going to introduce the special functions of our NSE6_FAD-6.2 study materials in detail to you.

It's a really convenient way for those who are preparing for their tests.

NEW QUESTION: 1
You administer a Microsoft SQL Server 2016 server that hosts a transactional database and a reporting database. The transactional database is updated through a web application and is operational throughout the day.
The reporting database is only updated from the transactional database.
The recovery model and backup schedule are configured as shown

in the following table:

At 14:00 hours, you discover that pages 71, 520, and 713 on one of the database files are corrupted on the reporting database. You need to ensure that the databases are restored.
You also need to ensure that data loss is minimal. What should you do?
A. Restore the latest full backup. Then, restore each differential backup taken before the time of failure from the most recent full backup.
B. Perform a point-in-time restore.
C. Restore the latest full backup, and restore the latest differential backup. Then, restore each log backup taken before the time of failure from the most recent differential backup.
D. Perform a page restore.
E. Restore the latest full backup.
F. Restore the latest full backup. Then, restore the latest differential backup.
G. Perform a partial restore.
H. Restore the latest full backup, and restore the latest differential backup. Then, restore the latest log backup.
Answer: F
Explanation:
Explanation/Reference:
Explanation:
At restore time, before you restore a differential backup, you must restore its base. Then, restore only the most recent differential backup to bring the database forward to the time when that differential backup was created. Typically, you would restore the most recent full backup followed by the most recent differential backup that is based on that full backup.

D. Option D
E. Option E
Answer: C,D,E

NEW QUESTION: 3
You are contracted as the network administrator, for a gaming
software company, Cisco . The CEO wants an improved
communication infrastructure and thus wants you to redesign the
existing network.
The following is the Cisco CEO's opinion:
* The goal is to become one of the top three peer-to-peer
online gaming software companies.
* There are currently 200 employees around the globe, of which
150 is located in London, the head quarters.
* Anticipated staff growth is set at around 500 employees in
two year's time. Of the 500 employees, 40% will work remotely
as a cost reduction method.
* With such a growth rate, the release of 20 titles in the next
12 months is anticipated.
Which additional pieces of information are necessary to design
the campus core? (Choose all that apply?)
A. The current implementation
B. The authenticity and security policy
C. The company's position in the gaming market industry
D. The current operating system.
E. The traffic pattern
Answer: A,E
Explanation:
Explanation
Cisco wants to redesign the network based on growth, therefore
the below are needed in the assessment:
Network Topology
Address Schemes
Concerns about the network
Incorrect Answers:
A: The OS is not relevant in the network redesign
B: Security and authenticity are not objectives and should
already be in place given the scenario.
E: Company position is irrelevant
