**NEW QUESTION: 3**

A customer has an Aruba Wi-Fi deployment with 20 AP-325s around their 100,000square foot (9,290,30 square meter) facility. The customer now wants to implement Aruba location services with the use of a venue Meridian app, along with Bluetooth as the technology for positioning.

Which type of information should the network administrator share with the customer to prepare them to meet their goal?

- A.** The customer will need to purchase USB beacons for management, but otherwise their AP-325s will handle the indoor positioning.
- B.** The customer can use their AP-325s as beacons, but may require more battery- powered beacons for an optimized indoor positioning deployment.
- C.** The customer will need to swap out their AP-325 deployment with battery-powered beacons, as they cannot be mixed in a deployment.
- D.** The customer will not need to purchase any more equipment since they already have AP-325s.

**Answer: C**
