#### **NEW QUESTION: 1**

When configuring guest WLAN access, which two statements are true? (Choose two.)

- A.** The foreign and anchor controllers must be configured in a mobility group for the foreign controllers to be able to initiate EoIP tunnels to one or more anchor controllers.
- B.** The mobility domain name of the anchor controller should be the same as what is configured for the foreign controllers.

C. The SSID that is defined for the guest WLAN on the foreign controllers must be the same as that defined on the anchor controller.

D. The foreign controllers must be defined with an ingress interface and an egress interface in the guest WLAN.

**Answer: A,C**

**NEW QUESTION: 2**

A receiving host computes the checksum on a frame and determines that the frame is damaged.

The frame is then discarded. At which OSI layer did this happen?

A. transport

B. session

C. network

D. physical

E. data link

**Answer: E**

Explanation:

The Data Link layer provides the physical transmission of the data and handles error notification, network topology, and flow control. The Data Link layer formats the message into pieces, each called a data frame, and adds a customized header containing the hardware destination and source address.

Protocols Data Unit (PDU) on Datalink layer is called frame.

According to this question the frame is damaged and discarded which will happen at the Data Link layer.

**NEW QUESTION: 3**

Working in the control procurements process since your project is using five contractors, you need to update a number of organizational process assets. An example is\_\_\_\_\_

A. Correspondence

B. Warranties

C. Procurement documentation

D. Procurement management plan

**Answer: A**

Explanation:

Explanation/Reference:

Explanation:

Contract terms and conditions often require written documentation of certain aspects of buyer/seller communications. Examples include any warnings of unsatisfactory performance and requests for changes in the contract or clarification. Other organizational process assets to update include payment schedules and requests and seller performance evaluation documentation.

**NEW QUESTION: 4**

Which of the following network configuration options contains a direct link between any two host machines?

- A. Bus
- B. Completely connected (mesh)
- C. Star
- D. Ring

**Answer: B**

Explanation:

Explanation/Reference:

Explanation:

A completely connected mesh configuration creates a direct link between any two host machines.

Incorrect answers:

A. A bus configuration links all stations along one transmission line.

B. A ring configuration forms a circle, and all stations are attached to a point on the transmission circle.

D. In a star configuration each station is linked directly to a main hub.
