If you bought our PEGAPCSSA86V1 exam pdf, you will be allowed to free update your dumps one-year, One year free update for more convenience, The pattern followed in study material of Wdh-Namgiang Pegasystems PEGAPCSSA86V1 is in accordance with the actual exam format.

NEW QUESTION: 1
An agile team has been struggling to keep up with the planned pace, which is frequently resulting in sprint failures What should the project manager do to help avoid this situation in the future?
A. Switch to a Kanban approach, implementing features on a first-come, first-serve basis, fostering a sustainable pace
B. Ask the project sponsor to approve overtime to compensate for the lack of performance while adjusting the plan
C. Replace junior team members with more experienced ones and negotiate the project scope to compensate for the budget gap
D. Review the velocity of the team over the last several sprnts and adjust the plan accordingly
Answer: D

NEW QUESTION: 2
On which protocol number does Encapsulating Security Payload operate?
A. 0
B. 1
C. 06
D. 2
Answer: B
Explanation:
Encapsulating Security Payload (ESP) is a member of the IPsec protocol suite. In IPsec it provides origin authenticity, integrity and confidentiality protection of packets. ESP also supports
encryption-only and authentication-only configurations, but using encryption without authentication
is strongly discouraged because it is insecure. Unlike Authentication Header (AH), ESP in transport mode does not provide integrity and authentication for the entire IP packet. However, in Tunnel Mode, where the entire original IP packet is encapsulated with a new packet header added, ESP protection is afforded to the whole inner IP packet (including the inner header) while the outer header (including any outer IPv4 options or IPv6 extension headers) remains unprotected. ESP operates directly on top of IP, using IP protocol number 50.

NEW QUESTION: 3
Using the Call Stack view, you can
A. examine the sequence of function calls leading up to the script or function that was executing at the time of the breakpoint
B. examine an expandable list of objects currently in memory
C. change the values of local variables
D. change the values of variables while debugging a remote object
Answer: A
