complicated exam.

From the above, we can see how important the
Professional-Cloud-Architect certification is, For candidates
who want to enter a better company through getting the
certificate, passing the exam becomes important.

NEW QUESTION: 1
A software as a service (SaaS) company offers a cloud solution for document management to private law firms and the public sector. A Local Government client recently mandated that highly confidential documents cannot be stored outside the country. The company CIO asks a solutions architect to ensure the application can adapt to this new requirement The CIO also wants to have a proper backup plan for these documents, as backups are not currently performed What solution meets these requirements?

A. Tag highly confidential documents as secret in Amazon S3. Create an individual S3 backup bucket m the same AWS account and AWS Region. Use S3 selective cross-region replication based on object tags to move regular documents to a different AWS Region Create an Amazon CloudWatch Events rule for a S3 objects tagged as secret to trigger an AWS Lambda function to replicate them into a separate bucket in the same AWS Region.

B. Tag documents as either regular or secret in Amazon S3. Create an individual S3 backup bucket in the same AWS account and AWS Region. Use S3 selective cross-region replication based on object tags to move regular documents to an S3 bucket in a different AWS Region. Configure an AWS Lambda function that triggers when new S3 objects are created in the main bucket to replicate only documents tagged as secret into the S3 bucket in the same AWS Region

C. Tag documents as either regular or secret in Amazon S3. Create an individual S3 backup bucket in the same AWS account and AWS Region. Create a cross-region S3 bucket in a separate AWS account. Set proper IAM roles to allow cross-region permissions to the S3 buckets. Configure an AWS Lambda function triggered by Amazon CloudWatch scheduled events to copy objects that are tagged as secret to the S3 backup bucket and objects tagged as normal to the cross-region S3 bucket

D. Tag documents that are not highly confidential as regular in Amazon S3. Create individual S3 buckets for each user Upload objects to each user's bucket. Set S3 bucket replication from these buckets to a central S3 bucket in a different AWS account and AWS Region. Configure an AWS Lambda function triggered by scheduled events in Amazon CloudWatch to delete objects that are tagged as secret in the S3 backup bucket.

Answer: A

NEW QUESTION: 2
Which statements are correct regarding virtual domains (VDOMs)? (Choose two.)

A. A management VDOM handles SNMP, logging, alert email, and FDN-based updates.

B. VDOMs divide a single FortiGate unit into two or more virtual units that each have dedicated memory and CPUs.

C. VDOMs share firmware versions, as well as antivirus and IPS databases.

D. Different time zones can be configured in each VDOM.
Answer: A,C

NEW QUESTION: 3
A Billing Specialist has created and completed an invoice for
$100 USD for Customer A.
The Specialist prints the invoice and realizes that the invoice
should have been created for Customer B.
The accounting for the transaction for Customer A is posted to
the General Ledger.
How can this be corrected?
A. Create an on-account credit memo for $100 USD for the
invoice and enter a new invoice for Customer B.
B. Create an adjustment for the entire amount and create a
negative adjustment for Customer B.
C. Navigate to the credit transaction link in the Billing work
area, credit the entire amount, and enter a new invoice for
Customer B.
D. Change the status of the invoice to Incomplete and enter a
new invoice for Customer B.
Answer: B

NEW QUESTION: 4
A customer is planning a technology update to its current
solution. The customer has an existing Storage Area Network
(SAN) based on IBM SAN32B-2 Fibre Channel (FC) switches. For
resilience, the customer has created a two-SAN Fabric, each
having 2 x SAN32B-2 switches, licensed for 24 ports each and
connected together by 2 x Inter switch Links (ISL). All the
legacy Intel-based severs have 2 Gb or 4 Gb Fibre Channel (FC)
Host Bus Adapters (HBA) installed and are due to be replaced.
However, due to project delays, the two-server solution
currently in use must remain in production to provide legacy
application support to the business. (The first server has a
pair of 2 Gb FC HBAs installed and the second server has a pair
of 4 Gb FC HBAs installed.)
Which recommendation should you provide to this customer for
replacing the FC switches while remaining cost-effective?
A. Single SAN48B-5 with full port licensing and 8 Gb Short Wave
SFP's installed
B. Single SAN96B-5 with 72 port licensed and 16 Gb Short Wave
SFP's installed
C. Pair of SAN24B-4 with full port licensing and 16 Gb Short
Wave SFP's installed
D. Pair of SAN06B-R with full port licensing and 8 Gb Short
Wave SFP's installed
Answer: A
